

BIOMONITORING AND WATER QUALITY SAMPLING

Coastal Resources, Inc. (CRI) scientists regularly develop and execute water resource assessment and analysis strategies to comprehensively evaluate resource conditions. Our in-depth water quality and biomonitoring services include:

- Tidal and Non-tidal Benthic Macroinvertebrate Sampling
- Fish Community Sampling and Analysis
- Fish Passage Identification and Assessment
- Fish/Mussel Salvage and Relocation
- Laboratory Identification of Freshwater and Estuarine Invertebrates
- In-situ Water Quality Sampling and Analysis
- Stream Habitat Assessment

Our staff hold industry standard certifications for biomonitoring, including Maryland Biological Stream Survey certifications and Society of Freshwater Science Benthic Macroinvertebrate Taxonomy certifications.

CRI's aquatic biologists have applied local and regional water quality monitoring protocols to stream and estuarine systems across the region, completing over 500 sampling events.

For more information about our Biomonitoring and Water Quality Monitoring services please contact us at 410-956-9000 or visit www.coastal-resources.net.

CRI is a **small, woman-owned certified Minority Business Enterprise/Disadvantaged Enterprise (MBE/DBE/WBE/SBE/WOSB)** with over 40 years of experience in natural resource assessments, permitting, mitigation, restoration design, and monitoring.
